Professional Services - Electrical Implementation Fee -	Electrical connection and maintenance services for AC powered devices by Flock qualified electrical workers.
Professional Services - Wing Gateway Implementation Fee -	

FlockOS Features & Description

FlockOS Features	Description
Wing Gateway, Wing Cloud, Wing VMS	Unlocks access to purchase Wing.
Custom Map Layers	The FlockOS® Map is powered by ESRI, which offers the ability for 3D visualization, viewing of floor plans, and layering of external GIS data.
Axon BWC (Body Worn Camera) Locations	Locate patrol officers and their BWC device statuses in one unified map view, optimizing coordination and response times.
Map PDF Attachments	
Camera Registry Program	Access a customizable, fully-hosted camera registry website to quickly identify nearby video sources during incidents. Strengthen community ties by incorporating fixed camera feeds from local schools, businesses, and neighborhoods. The interactive map lets you spot relevant cameras so you can easily contact camera owners to assist in investigations.
Automatic Vehicle Location (AVL) Connection	Boost situational awareness by displaying the Automatic Vehicle Location of patrol vehicles or other assets. This feature ensures resources are effectively allocated and response times are minimized.
Computer Aided Dispatch (CAD) Connection	Seamlessly incorporates your CAD system into FlockOS®. This crucial connection ensures that calls-for-service, locations, and actionable intelligence are displayed side-by-side, driving efficient call resolutions.
Floor Plans	Equip officers with detailed indoor layouts by layering building floor plans on the interactive ESRI-based map, enhancing tactical decision-making during incidents.
Drone Video Integration	Access live drone video feeds, locations, and device statuses in one unified map view, increasing situational awareness and driving safe responses to critical incidents.
FirstTwo Connection	Law enforcement agencies that already have an account with FirstTwo can enhance their Map by integrating vital intelligence to drive more informed responses. When there's an incident, like a License Plate Recognition (LPR) alert or a Computer Aided Dispatch (CAD) Call for Service, FlockOS will show markers on the buildings near the incident. By clicking on a building marker, information about the residents in that building will be displayed. This includes their names, ages, addresses, and a link to FirstTwo for phone numbers and additional details.
Regionalization Support	Enhance collective response and communications across your geographical region by pooling resources, technology, and intelligence. With FlockOS® Elite, you can share integrated CAD systems and cameras with neighboring agencies to coordinate quick responses to emerging threats and crime patterns, creating a safer community for residents in your broader area while maximizing resources.
Real-Time Routing	Promote safety by utilizing camera streams and vehicle history to predict a vehicle's direction of travel, minimizing the risks associated with vehicle pursuits.
SSO	Ability to sign into the Flock Safety platform via Okta Single Sign On (SSO). This increases login speed and information security.

By executing this Order Form, Customer represents and warrants that it has read and agrees to all of the terms and conditions contained in the previously executed agreement.

The Parties have executed this Agreement as of the dates set forth below.
